CAREER SUMMARY

Transitioned from software development to cloud and DevOps with hands-on experience in AWS, Docker, GitHub Actions, and Linux. AWS Certified Solutions Architect – Associate (SAA-C03), passionate about designing scalable, secure, and cost-effective cloud solutions while continuously expanding expertise in cloud infrastructure.

SKILLS

Technical Skills

- Front-End (React & Next JS)
- Linux Administration
- Backend Architecture
- Node JS
- Express JS + REST API
- AWS
- Microsoft Azure
- Cloud Infrastructure
- CI/CD Pipeline
- Docker
- Kubernetes (**Learning**)

Interpersonal Skills

- Customer-focused
- Effective Communicator
- Highly Adaptable
- Eager to Learn and Grow

CERTIFICATIONS

Basics of Computer Networks	Achieved Dec 2024
Microsoft Azure Cloud Fundamentals(AZ-900)	Achieved Feb 2025
Getting Started with Docker	Achieved April 2025
AWS Solutions Architect Associate	Achieved May 2026

TECHNICAL PROJECTS

Azure Auto Scaling Infrastructure

Deployed highly available infrastructure using Azure VMSS, Auto Scaling, Load Balancer and Health Probe. Ensured smooth deployment of backend APIs and improved fault tolerance through automated scaling and self-healing architecture.

Deployed React App Using CI/CD pipeline (Github Actions)

Configured a complete CI/CD pipeline for a full-stack React application. Pipeline includes:

Code formatting (linting), Automated tests, Code coverage reporting via **Codecov**, Zero-downtime deployment to **Amazon EC2**.

Ensured reliable and automated delivery of updates to production.

Containerized Python Application with Docker & Docker Swarm

Created a production-grade Dockerfile for a Python-based backend service and built its container image.

Configured **Docker Swarm** to deploy and load-balance the application across multiple nodes, improving scalability, reliability, and simplified deployment workflows.

WORK EXPERIENCE

CYBER METEORS as a *Front-end Developer*

May 2023 - Jan 2024

Punjab, Pakistan

- Developed a secure, interactive web application with a modern front-end framework(React JS) and an intuitive user interface
- Developed a full stack web application from scratch, including front-end interface and API integration.

TEVTA as a Cloud Engineer Intern

Sep 2024 - Mar 2025

Punjab, Pakistan

- Understood the basics of cloud computing, including the benefits and challenges of cloud adoption, as well as different cloud service models (IaaS, PaaS, SaaS).
- Explored the core components and services of Microsoft Azure, such as compute, networking, storage, and databases.
- Understood the security measures and compliance standards that Azure adheres to, ensuring data protection and privacy.
- Gained knowledge about how Azure pricing works, including cost management strategies and the different support options available.

EASE-CLOUD as a Full Stack Developer

May 2025 -

Aug 2025

Punjab, Pakistan

- Developed user-friendly web applications using JavaScript and React frameworks.
- Assisted in deploying applications on cloud platforms for scalability and access.
- Integrated APIs with the web applications using Restful Web Services.
- Maintained version control systems like Git for source code management.
- Deployed applications on cloud platforms such as AWS, Azure and Heroku.
- Configured and managed databases (both SQL and NoSQL), optimizing data storage and retrieval processes.
- Managed Azure resources (VMs, Storage, Networking) using Azure CLI & Portal.
- Assisted in pipeline integration using **GitHub Actions** for streamlined code delivery.

DISTRICT-X as a Full Stack Developer - Contract Based - Freelancing

Nov 2025 - Feb 2026

Punjab, Pakistan

- Developed a full stack web application with a modern user interface with impressive UI using modern technologies such as NextJS & Typescript.
- Hosted app on VPS with two different environments i.e. dev and production!
- Build CI/CD pipeline for continuous deployment and testing automation.
- Served the app using PM2 on the server.
- Currently working as a maintenance engineer and doing daily monitoring.

GENCLOUDS as a DevOps Engineer Trainee

Mar 2026 -

Present

Punjab, Pakistan

EDUCATION

Punjab University

Bachelors in Computer Sciences (CGPA: 3.3)

Graduation(Expected)

Dec 2027

Relevant Coursework: Object Oriented Programming, Data Structures, Algorithms and Analysis, Web Technologies, Networking, Operating Systems, Databases
